TOP 1

Protocol Nr. 84/2 of the meeting of the Board in Frankfurt on
2nd November 1984.

The first paragraph on page 2 (TOP 2) should read: "The Board de-
cides unanimously that the preliminary programme will be
in English only".

Otherwise the protocol is adopted without further amendments.

TOP 2

11th International Congress of the Society in Copenhagen

2.1. State of organization

- Dr. Henningsen reports that 117 active participants and 29 associates have registered so far.
- Only 6 firms have agreed to participate on the exhibition.
- Dr. Henningsen distributes a revised version of the budget (annex 1). This budget appears acceptable to the Board but it is hoped that an improvement is still possible.
- Due to the financial situation the question whether the banquet shall take place or not is still open; the final decision is left up to Dr. Henningsen.
- The manuscripts of the presentations must be delivered at the Congress; badly written manuscripts will be refused.
- Dr. Gathof (Munich) has offered to take care of printing the proceedings. Prof. Büttler will ask him for a detailed offer with prices. For the final decision other offers will also be considered; one will be submitted by Dr. Henningsen.
- Decisions are taken regarding the chairmanship of the various scientific sections.
- The problem of the Congress bags is not yet solved; Dr. Henningsen will try to find a cheap solution.

2.2. Selection of submitted abstracts

Dr. Henningsen puts forward a very well prepared proposal for arranging the submitted scientific contributions as oral presentations or posters in the programme. Based upon this the detailed scientific programme and the definitive time schedule is established.

TOP 3

Preparations for the general assembly in Copenhagen

3.1. Strategies for the internationalization of the Society

In order to foster the internationalization of the Society the Board will propose the change of the name of the Society into "International Society for Forensic Haemogenetics (ISFH)". It is felt that further steps are not required immediately. The question of the official language of the Society and of the Congress language will be settled automatically in the course of the evolution of the Society.

The Board has noticed that the "Arbeitsgemeinschaft der Blutgruppensachverständigen der Bundesrepublik Deutschland" is planning actions against the internationalization of the Society. The Board will not take any special counter-action. On the other hand the Board has ^{no} objection against the formation of a German speaking working group.

3.2. Proposals for the election of new members of the Board

Since Prof. Spielmann does not intend - for health reasons - to act as president for a second period, the Board asks Prof. Bütler to be its candidate for the election of the next president. Prof. Bütler agrees.

The Board then asks Dr. Lincoln to be its candidate for the next secretary. Dr. Lincoln asks for a little time to think it over. For the case of Dr. Lincoln's agreement the Board will have to find a candidate for the representative of the working groups.

3.3. Agenda for the general assembly

The draft presented by Professor Bütler is discussed point by point and adopted with minor alterations. Furthermore, the Board takes the following decisions:

- the Board will propose an alteration of the statutes allowing votation by letter;
- honorary membership will be offered to Dr. Margaret Pereira and Prof. Schwarzfischer;
- no official proposal will be put forward by the Board regarding the next place of Congress and the next Congress president. The Board will mention that there are still offers on from Dr. Polesky, Minneapolis, and Prof. Mayr, Vienna.

TOP 4

Scientific prize 1985 of the Society

The Board comes to the conclusion that among the four applications only Dr. Divall's work might be considered for the prize. However, there are serious doubts whether this work reaches the required quality level. In order to facilitate the final decision, Prof. Bütler asks Dr. D. A. Hopkinson (London) for his opinion.

TOP 5

Business of the president

There is no special business of the president to deal with.

TOP 6

Geographical distribution of the members

Prof. Bütler hands a corresponding list over to the members of the Board. Our Society comprises presently a total of 513 members from 33 nations.

New list of members

It is decided to distribute a new list of members before the Congress in Copenhagen. A simple copy of the computer list, reduced to a reasonable size, appears acceptable. Prof. Bütler will find out the cheapest solution.

List of collaborating laboratories

The secretariat has received offers from 6 laboratories for a collaboration in haemogenetic problem cases. It is decided to distribute a list of these laboratories to the members along with the next newsletter.

TOP 7

Business of the other members of the Board

Business of the treasurer

Prof. Brinkmann distributes and comments on a financial report dated 23 April 1985 (annex 2). The Board takes note with satisfaction that the Congress 1983 in Munich ended up with an excess of income of roughly DM 27'500.--.
