HIGHLIGHTS OF THE PRE CONGRESS

EDUCATIONAL WORKSHOPS

OF THE 22nd ISFG CONGRESS

COPENHAGEN 20 – 25 AUGUST 2007

On 20 & 21 August 2007, five workshops in forensic genetic aspects were held at 8 half-days sessions on:

- Statistical interpretation of crime case DNA
- STR with CE and trouble shooting
- mtDNA typing – EMPOP
- Relationship Testing Statistics
- Validation and implementation of new technologies

A total of 250 persons participated and lived with old-fashioned university facilities for two days.

The educational teams were fantastic and the participants were really enthusiastic.

The best educational event in the history of the ISFG.

Very best wishes and thanks to all the participants,

Niels
A two days workshop on ‘Statistical interpretation of crime case DNA’ was organised by Peter Gill. The following colleagues took part in the teaching: Charles Brenner, John Buckleton, James Curran, Ate Klosterman, Chris McGuire, Roberto Puch-Solis.
John Butler arranged two half day sessions: STR with CE and trouble shooting & Validation and implementation of new technologies.

Charles Brenner arranged the workshop: Relationship Testing Statistics.
Walther Parson organized ‘mtDNA typing – EMPOP’ together with the colleagues Anita Branstätter, Jodi A. Irwin, Sabine Lutz-Bonengel and Thomas J. Parsons.

Our warmest thanks to all the ‘teachers’ and participants.
